

# THE INSTITUTE FOR at Viewpoint FACIAL ESTHETICS

467 Pennsylvania Avenue, Suite 108 • Fort Washington, Pennsylvania • 19034

## COURSE DATES

June 17, 2010

November 15, 2010

Time - 8:00am—5:00pm

Registration: 7:30am

## All-on-4™:

Complete Arch Oral Rehabilitation and Immediate Function Using Tilted Implants

## FEATURING

THOMAS J. BALSHI, DDS, FACP  
Board Certified Prosthodontist

GLENN J. WOLFINGER, DMD, FACP  
Board Certified Prosthodontist

STEPHEN F. BALSHI, MBE  
Biomedical Engineer

Please refer to the web site [iffe.net](http://iffe.net) for complete instructor bio information.

## DESCRIPTION OF COURSE

The All-on-4™ treatment concept for complete arch rehabilitation is an economic yet attractive prosthetic solution utilizing the immediate loading concepts. Using tilted implants in the posterior region, the rehabilitation anchors all implants in anterior bone, while increasing the anterior/posterior spread of the implants and reducing posterior cantilevers. An all-acrylic provisional prosthesis can be delivered immediately after implant placement, following either the guidelines of the Teeth in a Day® protocol (free hand) or the NobelGuide™ protocol (computer-assisted).

## EDUCATIONAL GOAL

To familiarize participants with the surgical, prosthetic and post-treatment phases of dental implants using the All-on-4™ technique.

## EDUCATIONAL OBJECTIVES

- 1) To demonstrate treatment planning and pre-surgical procedures for the All-on-4™ protocol.
- 2) To provide clinical instruction via live procedures and hands-on instruction via model surgery for the All-on-4™ protocol.
- 3) To provide clinical patient management before, during, and after implant placement.
- 4) To identify the prosthetic options for the patient with All-on-4™ treatment

## COURSE CONTENT

All-on-4™ Fundamentals:

- Patient selection for All-on-4™ treatment
- Treatment planning for edentulous and dentate candidates
- Implant site preparation and placement of implants in the edentulous simulation model
- Placement of multi-unit abutments for prosthesis delivery
- Delivery of provisional prosthesis
- Post-op instructions and post-surgical recall appointments

## EDUCATIONAL METHODS

This course utilizes:

- Lectures and videos
- Observation of live surgery
- Hands-on use of components and surgical instruments
- Observation of virtual guided planning using NobelGuide
- Intra-oral video give the participants the "Surgeon's Eye View" of the live surgical procedure
- Interactive discussions during surgery
- Discuss the risks and benefits of the All-on-4™ technique and compare it to alternative treatment modalities
