

### COURSE DATES

To Be Announced

Time - 8:00am—5:00pm

Registration: 7:30am

### FEATURING

MARK LATTA, D.D.S., M.S.

Please refer to the web site [iffe.net](http://iffe.net) for complete instructor bio information.

## Miracles & Myths: Maximizing Success with Direct and Esthetic Materials and Techniques

### OVERVIEW

This one-day program gives the students the opportunity to gain the knowledge base and hands-on experience to take maximum advantage of modern materials for direct placement for esthetic dentistry. The day will be structured around a didactic program using an evidence-based approach to diagnosis, select the proper materials and the latest techniques in direct resin restorations. Following the morning lectures, the afternoon will provide the attendees to practically apply principals from the lectures.

### EDUCATIONAL OBJECTIVES

1. How to effectively bond resin adhesives to the distinctly unique histological tissues of enamel and dentin.
2. Participants will gain thorough insight into concepts such as physiology of sensitivity, moist dentin bonding, smear layer management, collagen fibril collapse and rewetting agents.
3. The histological role of dentin primers, etching times and nanoleakage, the role of polymerization stress and the indications, limitations, and mechanisms of action of self-etching systems.

4. Strengths and weaknesses of numerous bonding systems will be discussed as well as simplified techniques for consistent bonds and no sensitivity.

### COURSE CONTENT

- The absolutely critical steps in adhesion
- Whether self-etching systems are right for you
- Clearing up the myths about new composite resins
- Creating beauty with your bare hands by layering composite resins
- In-depth discussion of the composite resin systems available for anterior esthetic restorations
- The background of an innovation stratification method, mimicking the layering of porcelain will be shown
- The science of light curing will be explained clearly and simply so dentists can make good decisions about device selection and use

### FYI

Sponsored by  
The Institute For Facial Esthetics

TUITION: \$ 795.00

IFFE designates this activity for 8 hours continuing education credit.
